AUTOMATIC ELECTRIC COOKER HEAT PRESERVATION TYPE

Automatic Electric Cooker is equipped with a permanent Magnetic Controlling System. It's good-looking in designs, exquisite and solid in Construction, and easy, safety dependable to control, with low power.

INSTRUCTIONS

1. Cleaning and putting the rice into the pot.

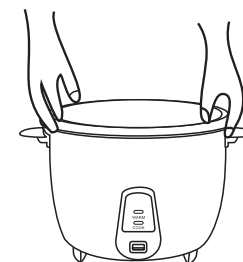

After cleaning the rice in another container, put it into the Pot. According To the rice soft / hard degree, add water. (See Fig 1)

Fig(1)

2. Placing the Pot

Place the Pot inside the Cooker and move it around so as to make it touch Closely with heating plate. Put the Lid on the top. (See Fig 2)

Fig(2)

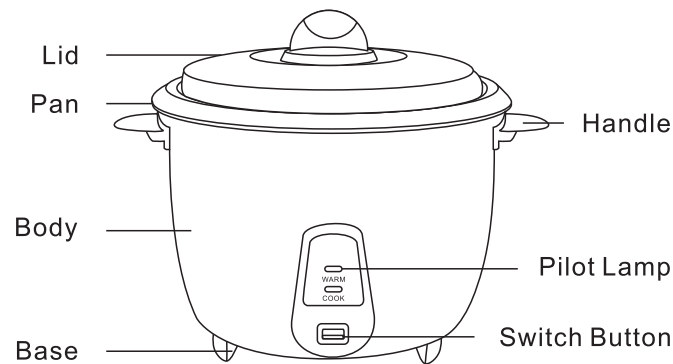

3. Cooking Rice

Connect the wire plug first into the input socket of the cooker, then put another plug in the power socket and switch on. At this time , the pilot red lamp and pilot yellow lamp will light up showing that the cooker is working. When the rice is well boiled , the switch button will be automatically realized and the pilot lamp will go out. Keep the Lid on for 10 Minutes and the rice will get thoroughly cooked.

4. Function of the Heat Preservation Unit.

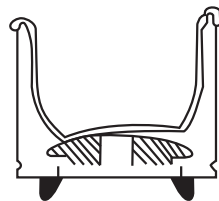

The temperature of the rice in the Cooker will automatically be kept within range of 60°C - 70°C. Below this point the pilot yellow lamp will begin to filcher, indicating that the Automatic Heat Preservation Unit has been set to work.
