Read the safety instructions first.

Thanks for buying this product, it is a high-density titanium coating for professional use, The perfect glide and heat-transfer qualities guarantee softness, shine and protection of the hair, it has the following features:

1. Professional titanium plates:38mm*115mm
2. .on/off switch-Automatic switch off
3. Operated indication light LCD
4. ."+" button,"-" button
5. 360 degree swivel cord
6. Floating plates: they make gliding and handing of the iron easier by applying constant pressure on the hair without damaging it
7. Curl function: to curl hair
8. Wet&Dry:designed especially for use on either dry or wet hair
9. Titanium Technology : fast heat up(230℃)
10. Locking system for optimal protection and storage

USE

Straightening: Plug in the appliance, switch on and allow to heat up.

For a smooth straightening, turn on the button and and show 190℃, then if you want to up the temperature, you can adjust it by the button "+",if you want to lower the temperature, you can adjust it by the button "-".

Thoroughly brush hair and section. Start with the underneath sections of hair. Take a section of about 5 cm width and place it between the 2 hot plates, being careful to avoid touching the hot surface of the appliance with your hand. Hold the hair firmly with the straightener and slide slowly along from the roots to the tips. Repeat again if necessary. Let the hair cool down before you comb it, After use, switch off and unplug the appliance. Allow to cool before storing away.

Curling: Take up a section about 2 to 3 cm wide and place it between the 2 heating plates, near the roots of your hair. Turn the straightener 130℃ upwards or downwards, depending on the desired curl. Slowly glide the straightener over the length of the section, from the roots to the tips. Remove the straightener and use your fingers to twist the section again so that it takes its natural position. Repeat if necessary. You may wish to set the curls using a light misting of hairspray.

Notes:

.The first time you use the unit, you may notice a little steam and a particular odor: this is common and will disappear the next time you use it. Note: when you are straightening, You might see some steam. Do not be concerned, this could be because of evaporation of the sebum, some residual hair products(leave-in hair care, hairspray, etc) or excess water that is evaporating from your hair.

.always select a lower temperature during the first use.

.it is possible to use a heat protection spray for optimal protection of the hair

.If straightening is not effective enough, tighten the plates more firmly on your strand and let the appliance glide more slowly

MAINTENANCE

.Unplug the straightening iron and allow to cool completely

. Clean the plates using a soft, dampened cloth, without soap, to preserve the optimal quality of the plates, Do not scratch the plates.

. To protect the plates, store the straightening iron with the plates closed tightly
